

Create ACBLscore results file for uploading via FTP

The results page to be displayed on your web site is created by ACBLscore. Please follow the step-by-step instructions.

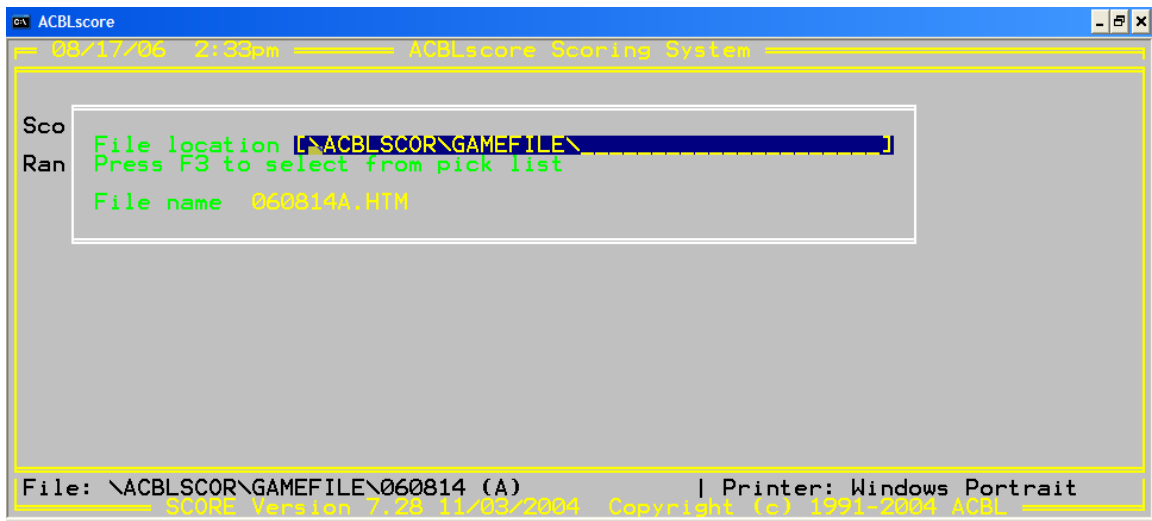

NOTE: If you have a multiple section game, you will do the first section and switch to the second (use function key F7 to switch) and append the second report to the first.

Start ACBLscore, select a game and **enter LR in the command** area. Please note, the giant letter A shows there are multiple sections for this game. After we do section A, we'll switch and do the second section. **Press ENTER after entering LR** as shown in the red circle below.

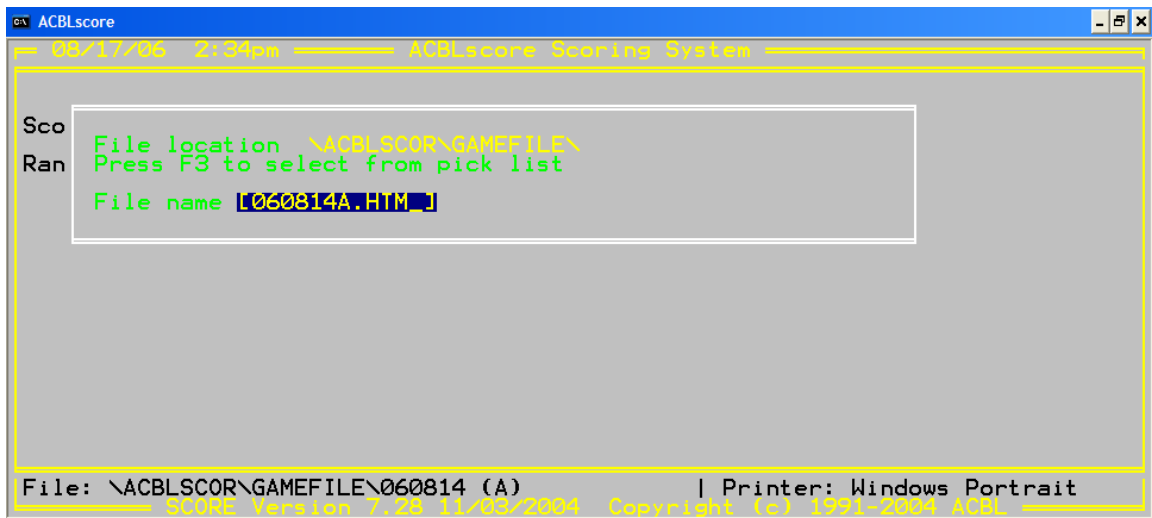

Select 4. HTML file and press ENTER

Create ACBLscore results file for uploading via FTP

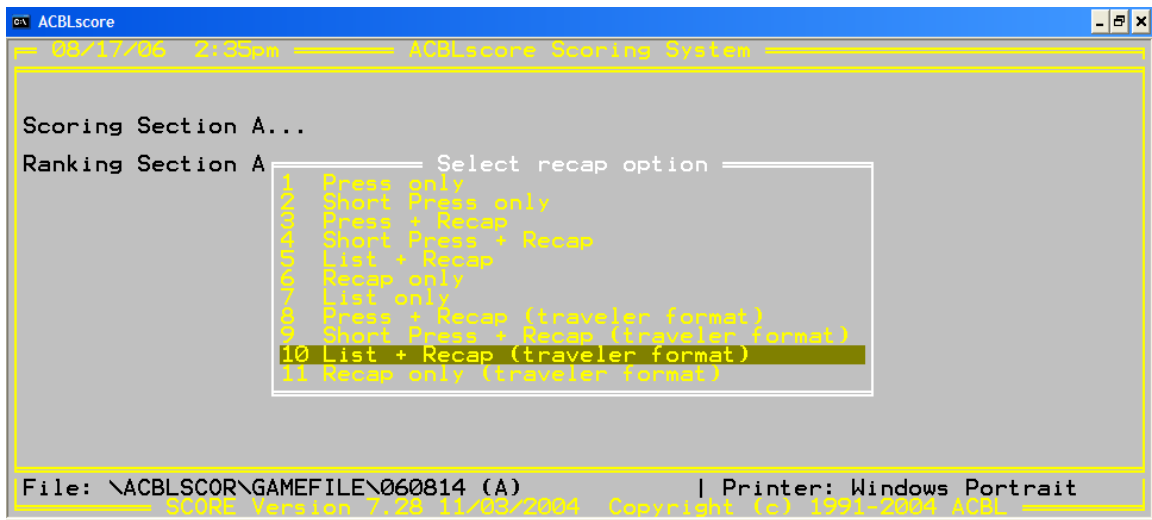

Do not change the file location (should be: \\ACBLSCOR\GAMEFILE\
PRESS ENTER

Do not change the default file name (should be something like 060814A.HTM)
PRESS ENTER

```

Press ENTER.

Create ACBLscore results file for uploading via FTP

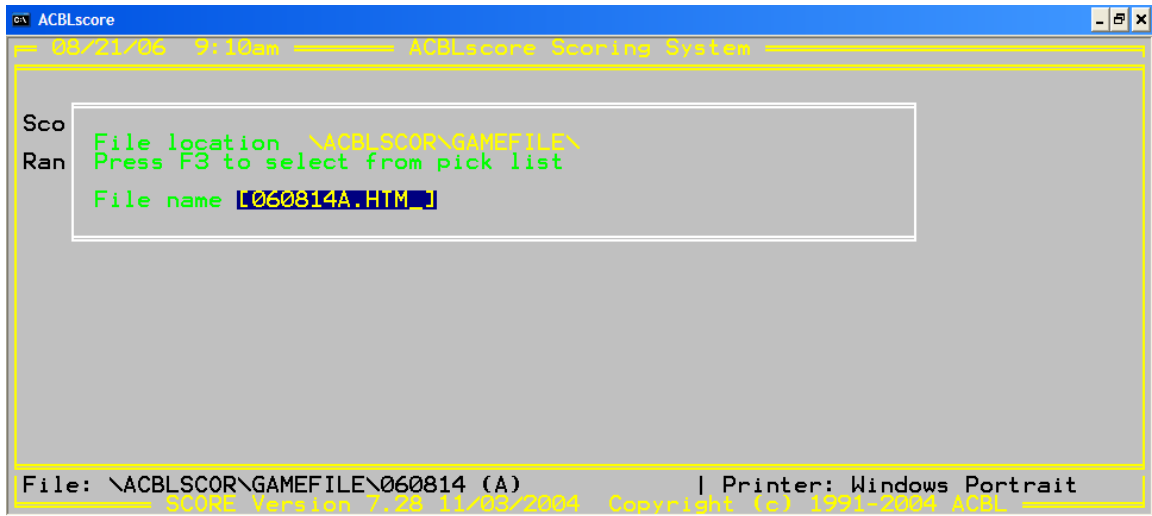

Press **ENTER**.

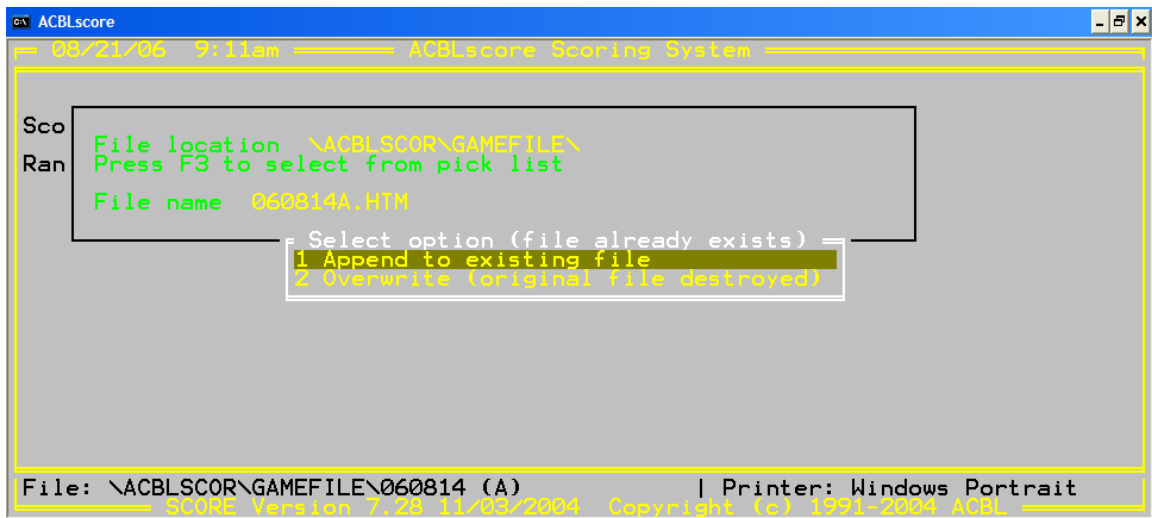

Press **ENTER**.

Create ACBLscore results file for uploading via FTP

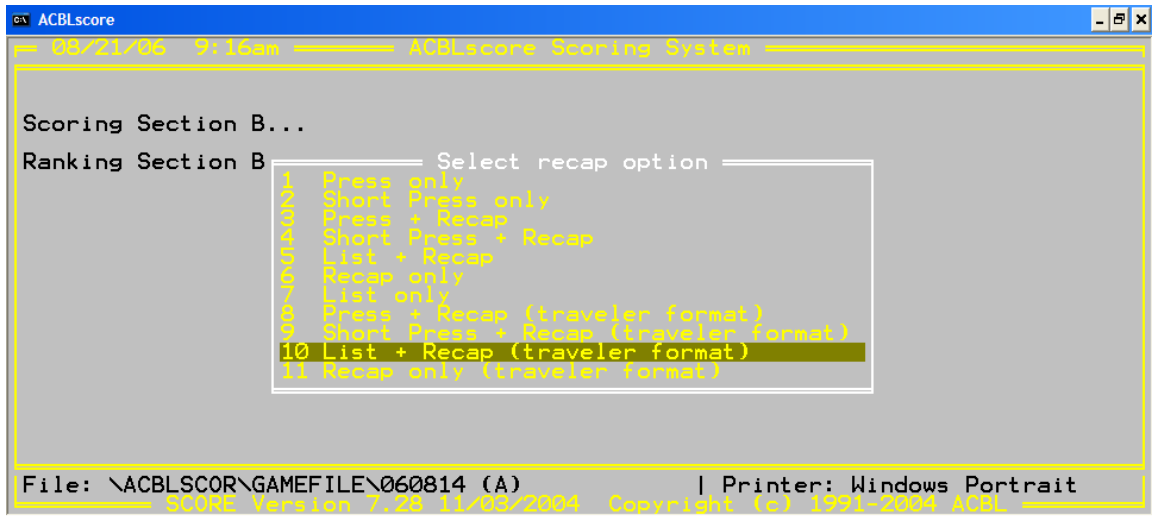

Press ENTER. On the next screen, you'll see a new option. Since you are adding the second section at the end of the first section file (060814A.HTM), you'll want option 1 "Append to existing file."

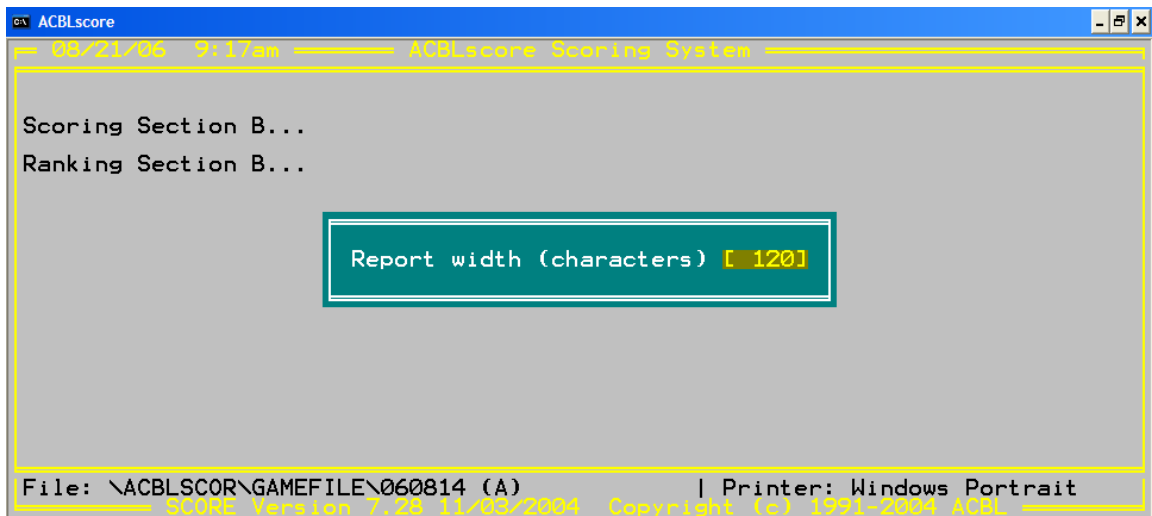

Since option 1 Append to existing file is selected, **press ENTER.**

Create ACBLscore results file for uploading via FTP

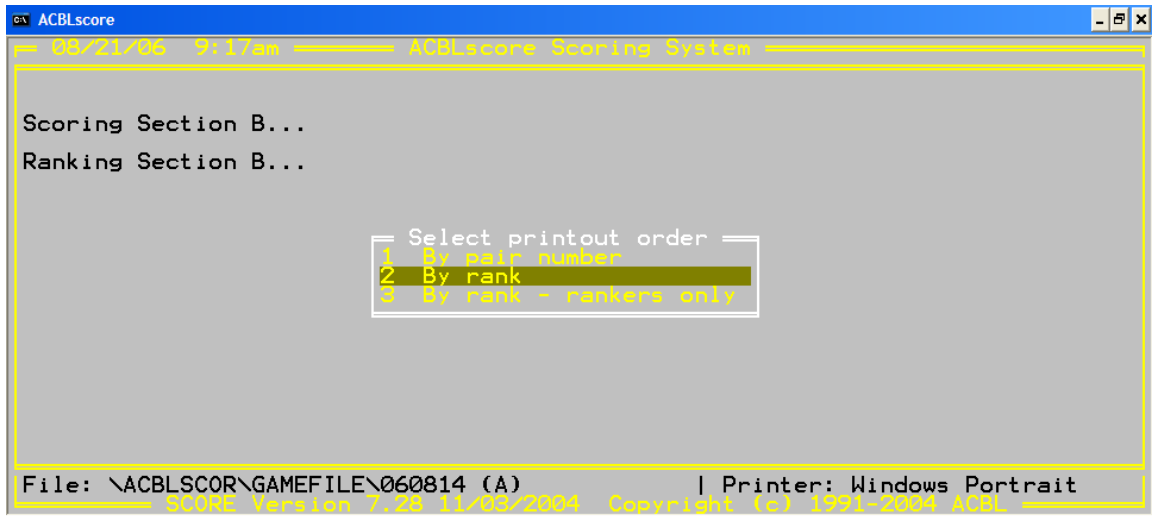

Press ENTER.

Press ENTER.

Create ACBLscore results file for uploading via FTP

Press ENTER.

Now it is really fast; keep hitting ENTER until your done (a repeat of the steps for the first section). The second section is appended to the first section and that is how it will be displayed --- Section A then Section B.
